Belgium-based Coozus unveiled an elevated vision of unique outdoor furniture, where refined design meets effortless practicality.

Crafted for every climate, Coozus' signature collection reimagines exterior furniture as a seamless union of comfort, protection, and contemporary elegance. At the heart of each piece lies an ingenious design: a sleek aluminum back shell that discreetly shields plush cushions from the elements. Rain showers, morning dew, drifting leaves, even the occasional unwelcome trace of nature—none disrupt the experience.

A precisely balanced mechanism allows the back shell to open with remarkable lightness, while an integrated soft-close system ensures each movement finishes with quiet refinement. The shell lifts to reveal perfectly dry, pristine seating, ready at a moment's notice. No hauling, no scrambling at the first sign of rain—just instant enjoyment.

For city terraces and coastal retreats alike, Coozus eliminates the perennial dilemma of off-season storage. Its intelligent open structure and breathable dry-foam cushions maintain their shape and freshness year-round. Even through winter, moisture and dirt are kept at bay, allowing cushions to remain outdoors without sacrificing comfort or longevity. Storage rooms remain uncluttered; outdoor spaces remain inviting.

Coozus furniture is designed to remain outdoors in every season as they are constructed from uncompromising materials: double powder-coated aluminum by Axalta, marine-grade stainless steel, and an anodized aluminum hinge system built for endurance. Cushions feature breathable dry foam and are upholstered in Sunbrella textiles that are renowned for their luxurious hand and exceptional resistance to sun, moisture, and environmental stress. Each component is meticulously chosen to preserve both beauty and performance, even in demanding coastal environments. The fabrics maintain their color and softness; the structure withstands moisture, UV exposure, and shifting temperatures. A wide variety of exterior colors and cushion fabrics are available.

Coozus seating solutions range in price from 720 Euros for a side table to 1,965 Euros for a Model 2.1 Comfort Chair and 4,290 Euros for the larger Model 1.1 Lounge Chair.
